Peggy – you should hear soon from Kushal Som in our air program on this.

Best,

Alan

Subject: Maganese Investigation

Alan,

Following our concern over the high levels of manganese in our area, a teacher reported that a lab was going to be set up at Washington high school to further investigate the source of the manganese levels. What ever happened to that initiative? I can't remember if it was the EPA or IEPA who had intended to do that.
